

Integrating Technology into ESOL Instruction

Principle	Instructional Activity	Technology Support
1. Learners are engaged in authentic and multidisciplinary tasks		
2. Assessments are based on the performance of real tasks		
3. Learners participate in interactive modes of instruction		
4. Learners work collaboratively		
5. Learners work in heterogeneous groups		
6. Learning takes place through exploration		
7. Learners define and pursue individual interests		
8. Learning builds on life experiences		
9. Learning can be readily applied to real life contexts		
11. Instruction supports the four skill areas: reading, writing, listening, speaking
